Index ☐ Volume 40, 1992

ARTICLES *(by title)*

Advancements in instructional design theory: Contextual module analysis and integrated instructional strategies, Robert D. Tennyson, Robert L. Elmore, and Leonard Snyder, 40:2, 9–22.

Authoring systems reassessed, Craig Locatis, Eldon Ullmer, Victor Carr, Richard Banvard, Quang Le, Raulie Lo, and Matthew Williamson, 40:2, 77–82.

Bubble dialogue: A new tool for instruction and assessment, Language Development and Hypermedia Research Group, 40:2, 59–67.

Classroom restructuring: What do teachers really need?, Barry J. Fishman and Thomas M. Duffy, 40:3, 95–111.

Cognitively based models of courseware development, J. Michael Spector, Daniel J. Muraida, and Mary R. Marlino, 40:2, 45–54.

Computer-based microworlds: A bridge between constructivism and direct instruction, Lloyd P. Rieber, 40:1, 93–106.

Constraints to curriculum reform: Teachers and the myths of schooling, Kenneth Tobin and George Dawson, 40:1, 81–92.

The contributions of cognitive science and educational technology to the advancement of instructional design theory, Franz Schott, 40:2, 55–57.

Cooperative learning and computer-based instruction, Simon Hooper, 40:3, 21–38.

A critical review of elaboration theory, Brent Wilson and Peggy Cole, 40:3, 63–79.

Developing a database of authoring system software, Raulie Lo, Craig Locatis, Eldon Ullmer, Victor Carr, Richard Banvard, Quang Le, Matthew Williamson, and Michael Ackerman, 40:2, 69–76.

Educational technology: Four decades of research and theory (Introduction to Special Issue), Steven M. Ross, Howard Sullivan, and Robert D. Tennyson, 40:2, 5–7.

Effect of personalization of instructional context on the achievement and attitudes of Hispanic students, Cecilia L. López and Howard J. Sullivan, 40:4, 5–13.

Effects of cooperative learning and need for affiliation on performance, time on task, and satisfaction, James D. Klein and Doris R. Pridemore, 40:4, 39–47.

Effects on children's achievement and curiosity of variations in learner control over an interactive video lesson, Marilyn P. Arnone and Barbara L. Grabowski, 40:1, 15–27.

Elaborating the elaboration theory, Charles M. Reigeluth, 40:3, 80–86.

Emerging technologies, ISD, and learning environments: Clinical perspectives, Michael J. Hannafin, 40:1, 49–63.

Evaluating instructional software: A simplified model, Jane E. Zahner, Robert A. Reiser, Walter Dick, and Barbara Gill, 40:3, 55–62.

An interactive systems model derived from experts' perceptions of human-computer issues, Warren C. Weber, 40:1, 29–39.

Introduction to special issue, Michael J. Hannafin and Simon Hooper, 40:1, 47.

The Jasper experiment: An exploration of issues in learning and instructional design, Cognition and Technology Group at Vanderbilt, 40:1, 65–80.

Learner control modes and incentive variations in computer-delivered instruction, Samuel Hicken, Howard Sullivan, and James Klein, 40:4, 15–26.

Learner control of context and instructional support in learning elementary school mathematics, Gary R. Morrison, Steven M. Ross, and Walter Baldwin, 40:1, 5–13.

Mental models: A research focus for interactive learning systems, Hueyching Janice Jih and Thomas Charles Reeves, 40:3, 39–53.

Metacognition research and theory: Analysis and implications for instructional design, Mohamed E. Osman and Michael J. Hannafin, 40:2, 83–99.

Modeling student performance in diagnostic tasks: A decade of evolution, William B. Johnson and Jeffrey E. Norton, 40:4, 81–93.

Productivity tools for simulation-centered training development, Allen Munro and Douglas M. Towne, 40:4, 65–80.

Rapid prototyping in automated instrutional design, Mark K. Jones, Zhongmin Li, and M. David Merrill, 40:4, 95–100.

Reference citations in selected instructional design and technology journals, 1985–1990 (Special Report), Gary J. Anglin and Robert L. Towers, 40:1, 40–43.

Selective use of animation and feedback in computer-based instruction, Ok-choon Park and Stuart S. Gittelman, 40:4, 27–38.

Some uneasy inquiries into ID expert systems, Craig Locatis and Ok-choon Park, 40:3, 87–94.

Toward a computational model of tutoring, Beverly Park Woolf, 40:4, 49–64.

Training for reflective expertise: A four-component instructional design model for complex cognitive skills, Jeroen J. G. van Merriënboer, Otto Jelsma, and Fred G.W.C. Paas, 40:2, 23–43.

The use of informational feedback in instruction: Implications for future research, Edna H. Mory, 40:3, 5–20.
